MANAGEMENT COMMENTARY

In December 2020, the NOVA Green Energy fund appreciated by 0,36 % and the overall result since the beginning of the year is - 5,97 %. The production of photovoltaic power plants in the last 3 months of 2020 was below the value of the energy audit, specifically in November by 6 % lower. Biogas stations and a biomass heating plant in Krnča are at the expected average.

The new photovoltaic project in Csabrendek, Hungary, with an output of 28,5 MW is fully under the control of the fund. The fund has a valid contract for construction and financing is in the phase of preparation of loan documentation. A very high voltage substation has already been completely implemented on site, and deliveries of some components have already been completed. The handover of the construction site in the case of photovoltaic farms is planned for January 2021.

In Slovakia, we are preparing an application for the grid connection of 500 kW photovoltaics to the roof of the Industrial Park in Trenčín. The building of the Orlice Hradec Králové shopping center applied for a subsidy from the OPPIK of the Ministry of Industry and Trade for the construction of rooftop photovoltaics with an output of 500 kW and a battery storage facility. We are still waiting for the opinion of the Ministry of Industry and Trade. For other buildings of the sister real estate fund, we are preparing pre-registration calls for the Modernization Fund, which was launched in 2021.

The projects of both biomass heating plants, whose receivables were subject to revaluation, concluded a long-term refinancing agreement with a new bank in December, which will finance the heating plants directly. In the coming months, we plan to more actively participate in the management of heating plants together with the new bank in order to optimize the operation with regard to the sub-fund's position as a creditor. After development of Arca Capital group situation, we will communicate with the bank regarding obtaining approval to acquire both energy sources into the sub-fund's assets. We will inform you about next steps.
